SERVICE OVERVIEW

Microsoft Defender Health Check

Maximize the effectiveness of your Microsoft Defender implementation.

Maximize the value of your Microsoft Defender implementation with a tailored health check that strengthens protection and improves visibility. This one-time engagement identifies configuration gaps and provides expert recommendations to fine-tune Defender for your organization.

The NuHarbor advantage

Our Defender Health Check is built on deep Microsoft expertise and real-world security experience to deliver meaningful results.

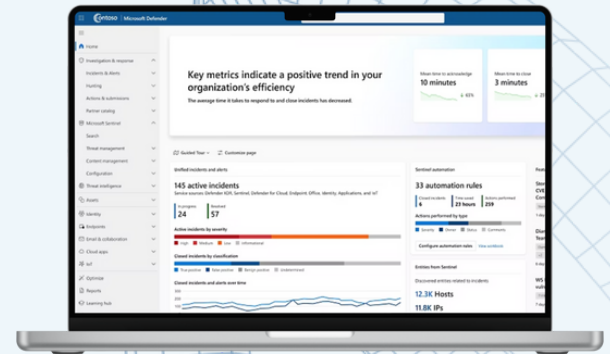

-  Microsoft security specialists with hands-on Defender expertise
-  Actionable guidance aligned to your environment and priorities
-  Proven methodology for configuration, tuning and optimization
-  Demonstrated value through measurable security outcomes
-  Trusted partner to public and private sector organizations for over a decade

Our approach

We follow a phased, targeted approach designed to quickly assess, tune, and enhance your Microsoft Defender deployment.

1. Review Defender environment and configuration
2. Validate settings against best practices and policies
3. Recommend tuning of alert thresholds and detection sensitivity
4. Share automated response strategies for known threats

"NuHarbor's Defender Health Check identified configuration gaps, reduced noise, and helped us tune Defender. It was a smart investment."

Key benefits

Strengthen your security posture and ease the burden on your team by tuning Defender for better performance and clearer threat detection.

Accelerate threat detection and response

Reduce false positives and alert fatigue

Eliminate blind spots to improve coverage and confidence

Get more from your Microsoft investment

Maximize your Microsoft Defender protection.
