nuHarbor

Service Overview

Managed Service for Microsoft Purview.

Use Your Existing Purview Investment to Protect Your Sensitive Data or Your AI-Enabled Future.

Microsoft Purview services are essential for protecting sensitive data and understanding where it lives and how it's used. This protection is not a one-time project. Environments change. Data moves. Risks evolve. The rise of AI-driven tools and expanding data access make continuous, active Microsoft Purview Services management more urgent than ever.

nuHarbor's Microsoft Purview Services, backed by trained experts, helps you stay ahead. We'll show you where you're exposed, where employees and applications interact with sensitive information, and ensure your environment stays aligned with your business and compliance needs.

Our Approach

Protecting sensitive data is a crucial and continuous element of your security program. Our Purview Managed Service provides you with the tools to improve your information protection as your business evolves.

1. Configure Purview in collaboration with your security, privacy, and business leaders to meet your specific needs.
2. Prioritize your risk-based protection strategies by adding context and delivering actionable content.
3. Uncover new insights through Purview Compliance Manager, DLP, and more, with recommended actions to drive improvements.
4. Select a co-managed or fully managed model based on your preferred level of control and oversight.

Microsoft Purview Services Highlights & Benefits

What You Get

- Continuous discovery and protection of sensitive data
- A Purview environmentaligned to your evolving business and compliance needs
- Identification of new risks, exposures, and blind spots
- Expert-driven reporting, tuning, and prioritized risk guidance

Key Benefits

- Focus your security team on strategy, not daily maintenance
- Stay ahead of evolving compliance requirements and emerging risks
- Make data protection a core part of your security operations
- Protect sensitive data and improve your security posture over time
